COMPANY PROFILE

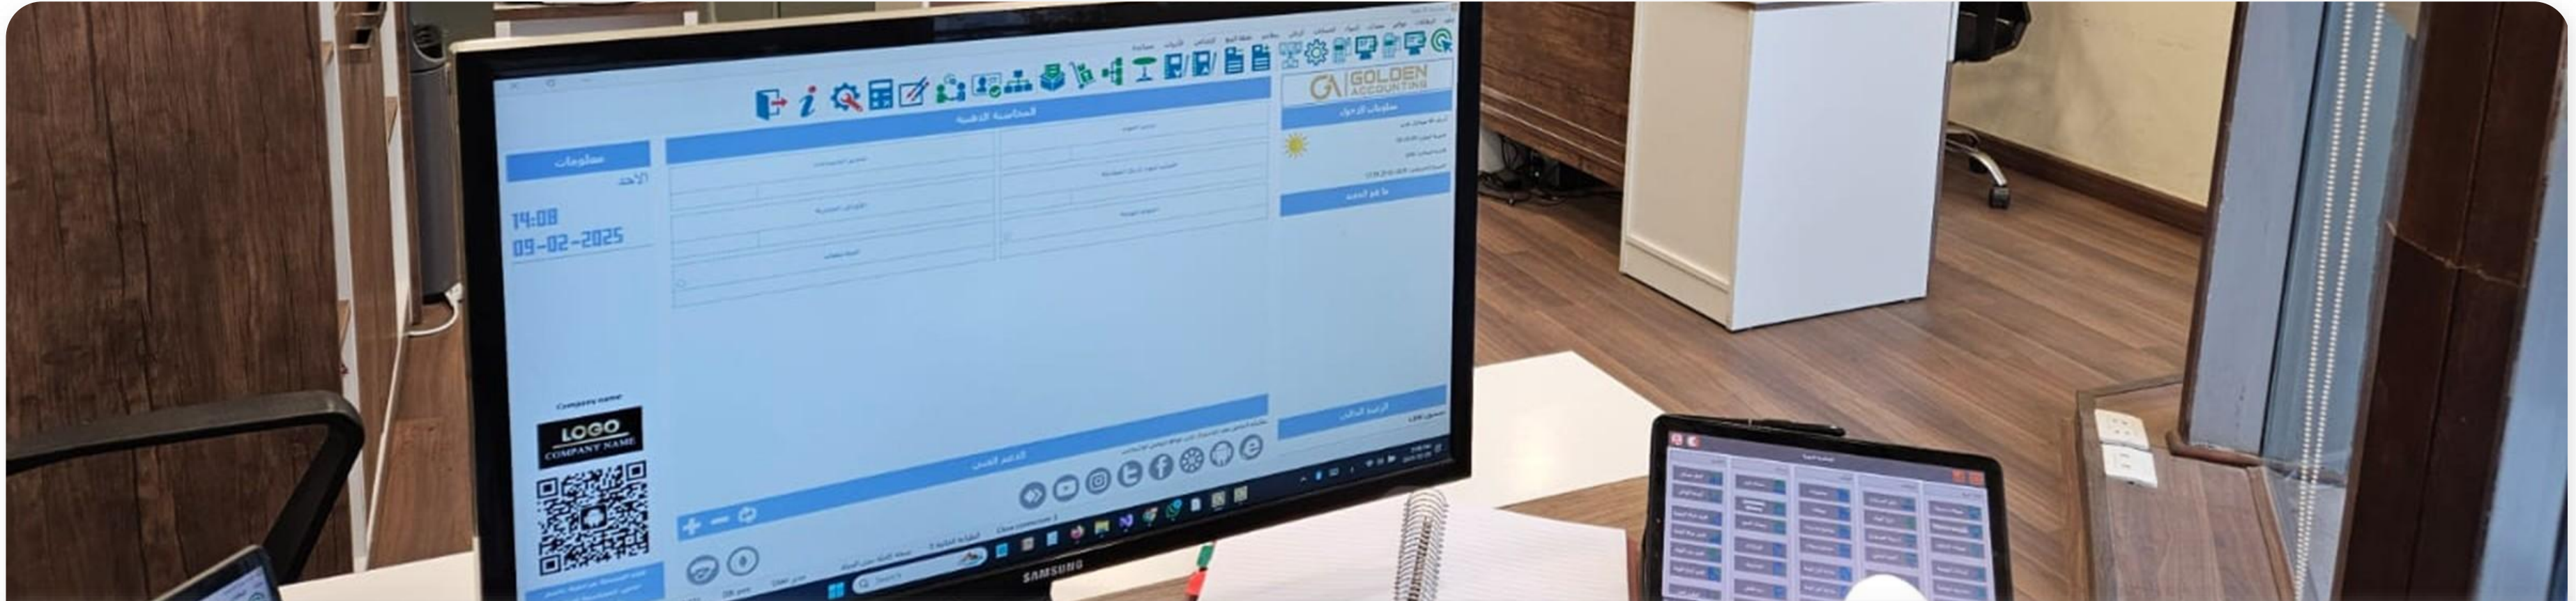

ABOUT OUR COMPANY

Golden Accounting, which has been in operation since 2015, helps businesses efficiently manage accounting, inventory, point of sale (POS), human resources, manufacturing, and distribution. It automates key operations such as payroll, invoicing, and reporting, providing businesses with accurate financial insights and compliance with tax regulations in various countries.

The software supports electronic invoicing, customizable financial reports, and a cloud-based system for multi-platform accessibility. It also includes a mobile app for Android devices, allowing users to manage their business on the go. With its user-friendly interface and powerful automation, Golden Accounting enhances operational efficiency and financial accuracy.

VISION & MISSION

Vision

To be the leading provider of smart and innovative accounting solutions that empower businesses with seamless financial management and operational efficiency

Mission

- A user-friendly solution for automated financial management.
- Enhancing business efficiency by utilizing advanced financial analysis tools.
- Reporting and invoicing that comply with tax regulations.
- Globally empowering businesses with innovative, cost-effective accounting tools.

OUR SERVICES

Financial Accounting

A comprehensive accounting system that helps businesses accurately record transactions and generate reports with ease.

Distribution System

This system allows users to monitor subscribers, determine subscription dates, and identify expired and close to expired subscriptions, allowing continuity of service provision and efficient financial transactions.

Subscription System

Allowing businesses to manage recurring subscriptions, automate billing cycles, and ensure accurate invoicing and financial control for subscription-based services.

Hotel Management System

System for managing hotel operations, including booking reservations, checking in guests, and invoicing, ensuring smooth financial and operational workflows.

OUR SERVICES

Fixed Asset Management

Managing the lifecycle of fixed assets, including asset tracking and depreciation calculations, and financial reporting to ensure accurate asset valuation.

Manufacturing System

Automating production processes, tracking raw materials, and optimizing inventory and cost control, helping businesses enhance their efficiency and cost control.

Point of Sale System

An integrated solution for retail and hospitality businesses, offering user-friendly interfaces for managing transactions, inventory, and financial data in real time.

Human Resource Management

Managing employee records, payroll processing, and leave management, and ensuring compliance with labor regulations.

KEY FEATURES

- 01 Comprehensive & Integrated Solutions**

A wide range of services including accounting, human resource management, manufacturing, distribution, and hotel management, cater to the needs of various sectors.
- 02 Global Tax Compliance**

Provides full support to Saudi Arabian requirements, including e-invoicing, while aligning to tax regulations in Turkey, Jordan, Syria, Egypt, and other countries – ensuring accurate reports and legal certainty.
- 03 Cloud Technology**

An advanced cloud platform enables real-time monitoring of operations and management. With full synchronization between Windows and Android, your data stays safe and fully controlled, wherever you go.
- 04 Multiple Operating Systems**

Support for different operating systems, including mobile applications, ensures flexibility in operations.
- 05 User-Friendly Interface**

An intuitive user interface design that makes learning and usage easy, even for beginners.
- 06 Automation and Efficiency**

Automation of routine tasks such as payroll, invoicing, and reporting, saving time and reducing human errors.
